

OHIO DEPARTMENT OF REHABILITATION AND CORRECTION
*******INTEROFFICE MEMORANDUM*******

TO: Executive Staff and All Wardens

THRU: Dr. Ed Rhine, Deputy Director
Office of Policy and Offender Reentry

Steve Van Dine, Chief
Bureau of Research

FROM: Lee Norton, Asst. Chief
Bureau of Research

DATE: January 24, 2006

The Bureau of Research is pleased to release the July 1, 2004 Institutional Census for the Ohio Department of Rehabilitation and Correction. This statistical report provides information on the total adult prison population in Ohio and includes data on the age, gender and race of these prisoners, as well as on the committing county, most serious commitment offense, the felony level of that offense, and the minimum, average and maximum sentences for each felony level. The information presented in the tables is broken down by gender and pre-Senate Bill 2 vs. Senate Bill 2 commitment status of the offender. Two new breakdowns of the data have been provided for the first time this year. Both county of commitment (see Table on pages 2-3) and inmate age (see Table on page 5) have been broken down by race (into categories of black, white and other). This was done because of the increasing number of requests that we have received for this information.

The information presented in this report is used for departmental planning, and one of the important facets of this process is the comparison of current information with information on the same variables from prior years. We thought it would be both interesting and useful to compare the data from July 1, 2004 with that from July 1, 2003, to see what changes have occurred within the past year. Some highlights from this comparison are presented below. If the reader wants to make a detailed comparison of the 2004 and 2003 data or a comparison with institutional census data from 2001 or 1997, the Institutional Census reports for all of those years can be found on the department's website under Bureau of Research/Census Reports.

Comparison of 2003 and 2004 Census Findings

- The total incarcerated population declined about 3%, from 45,363 in 2003 to 44,015 in 2004. More than three-fourths of the decline came among black males, whose numbers went down by 6%, from 21,438 in 2003 to 20,171 in 2004 (a decrease of more than 1,200 inmates). There were declining numbers, as well, of black females (down 3%) and white

males (down 1.4%). On the other hand, the number of incarcerated white females rose by 10%.

- The percent of the incarcerated population committed from the six most populated counties (Cuyahoga, Franklin, Hamilton, Lucas, Montgomery and Summit) declined by 5%. Two-fifths (41%) of that decline came in Cuyahoga County (where there were 556 fewer commitments) and another fourth (28%) in Franklin County (with 382 fewer commitments).
- The average age of the incarcerated population did not change between 2003 and 2004, remaining at approximately 35 for both males and females. Every five-year age grouping among the total population between the ages of 15 and 54 showed a small decline between 2003 and 2004, while the 55-59 and 60 and over age groups showed a small increase. An unusual pattern concerning age and race, for which there is no obvious explanation, should be noted. For each age up through age 32, the majority of inmates were black. For each year of age 33 and up, the majority of inmates were white.
- Differences in the most serious conviction offense between inmates in the 2003 and 2004 populations were mixed. The largest declines were among those inmates who were committed on a crime against another person, excluding sex offenses (down 6.8%), burglary offenses (down 5.7%) and sex offenses (down 5.5%). The declines in the number of inmates committed on crimes against persons and sex offenses are consistent with the Lane decision, which resulted in the review of parole decisions for long-term offenders leading to the release of a significant number of these offenders.
- The greatest increases in the most serious conviction offense between the 2003 and 2004 populations were among those inmates who were committed on a drug offense (up 8.2%), and an offense against justice/public administration (up 6.1%). The greatest increases in the crimes against justice/public administration were for taking the identity of another (up 60%), violation of own recognizance (up 30%) and tampering with evidence (up 11%).
- As expected, the number of inmates committed on a pre-Senate Bill 2 offense continued to decline. While they comprised about one-third (31%) of the population in 2003, they made up only one-fourth (24%) of the population in 2004.
