## ACKNOWLEDGMENTS

### **Coding of Offender History Information**

- Classification Specialists (Bureau of Research)  
Jim Bates  
Reeda Boyd  
Ronnie Easter  
Cindy Gonzalez  
Vicky Muncy

### **Preparing/gathering PSIs/OBIs - Adult Parole Authority - Field Services Section**

- Special thanks to Harry Hageman, Deputy Director, and Sara Andrews, Superintendent, for authorizing APA to work on the study.
- For coordinating investigation preparation/submission:

#### Parole Program Specialists (Case Analysts)

Stacy Shelton-Ewing, Dick Bosley, Cincinnati Region  
Margie Reindel, Lima Region  
Steve Vargo, Chillicothe Region  
Charlene Martin, Cleveland Region  
John Renner, Akron Region  
Becky Vogel, Mansfield Region  
Tracy Conklin, Columbus Region

Debra Hearn, Parole Program Specialist Supervisor  
Katrina Ransom, Parole Program Specialist Supervisor

Michael Jackson, Deputy Superintendent  
Glen Jackson, Deputy Superintendent

- For preparing/gathering PSIs/OBIs:

All Unit Supervisors and Parole and Probation Officers who completed offender background and pre-sentence investigations, the support staff who typed the finished reports, as well as the support staff who assisted with processing of the reports.

### **Assistance at DRC Reception Centers**

- All the staff that enabled the Bureau of Research to efficiently collect demographic and social characteristics information from the offenders.

## EXECUTIVE SUMMARY

### Social and Demographic Characteristics

- Of the 3553 offenders included in the study, 87.7% were male and 12.3% were female. [Table 1]
- The racial composition of the intake sample was: 46.2% African American, 53.3% Caucasian, 0.2% American Native, and 0.3% Other. [Table 2]
- The ten counties with the greatest numbers of offenders committed to Ohio prisons during the intake study period were: Cuyahoga (N=689; 19.4%), Hamilton (N=429; 12.1%), Franklin (N=273; 7.6%), Summit (N=228; 6.4%), Montgomery (N=209; 5.9%), Stark (N=125; 3.5%), Butler (N=116; 3.3%), Lorain (N=111; 3.1%), Lucas (N=101; 2.8%), and Mahoning (N=68; 1.9%). [Table 3]
- The average age of offenders in the intake study was 32.4 years and the median age was 31. Males had an average age of 32.2 and a median age of 30. Females had an average age of 33.6 and a median age of 31. [Table 4]
- At the time of arrest (for the current most serious commitment offense), roughly two-thirds (67.4%) of the offenders were single (never married), 11.4% were married and 21.2% were separated, widowed, or divorced. Men were more likely to have never been married (68.7%) than women (58.1%). [Table 5]
- At the time of arrest, 56.1% of the offenders were unemployed; 29.1% were employed full-time. Males were more likely to have been employed full time (31%) than females (16%). The possibility that more women were engaged in care for their children as a vocation complicates this comparison. [Table 6]
- At the time of arrest, the educational attainment of the males was as follows: 6.2% had a grade school education or less, 37.2% had some high school, 40.4% were high school graduates or the equivalent but had not attended college, and 16.1% had some college training or had graduated. The respective education rates for females were: 6.3%, 38.5%, 33.4% and 21.7%. [Table 7]
- The data collected from self admissions, social and criminal history records indicate that the female inmates in the sample had a much higher percentage of the following than their male counterparts:
  - ❖ Physical abuse as a child or adolescent (female = 26.2%; male = 10.2%); [Table 9]
  - ❖ Sexual abuse as a child or adolescent (female = 34.3%; male = 5.3%); [Table 10]
  - ❖ Mental health problems (female = 51.4%; male = 26.4%); [Table 11]
- In regard to the prevalence of inmates involved in recent drug abuse, female offender rates were higher than males (female = 84.7%; male = 77.5%).\* [Table 12] Males were slightly more likely than females to have had a history of drug abuse (female = 85.8%; male = 87.8%) [Table 13] and more likely to have had recent alcohol abuse (female = 42.3%; male =

---

\* Recent drug or alcohol abuse is abuse that occurred within the 6-month period prior to arrest for the current commitment offense. A history of drug abuse is abuse that occurred more than 6 months prior to that arrest date.

49.8%) [Table 14] and a history of alcohol abuse (female = 62.9%; male = 67%). [Table 15] The likelihood of having completed a substance abuse treatment program was greater for male offenders (male = 29.4%; female = 28%). [Table 16]

### Current Most Serious Commitment Offense

- About a third of the males (32.4%) were incarcerated for committing a crime against persons (including sex offenses) as their most serious offense, with almost another third (28.8%) for committing a drug offense. Just over one-third (36.8%) of the females were incarcerated for committing a drug offense as their most serious offense, while just over one-fifth were incarcerated for a miscellaneous property offense (21.5%) and over one-sixth (18.1%) for committing crimes against persons (including sex offenses). [Table 19]
- The five offenses (most serious commitment offense) for which the male and female offenders in the sample were most often committed were: [Table 19]

<u>Males</u>		<u>Females</u>	
Drug Possession (previously Abuse)	16.8%	Drug Possession (Abuse)	21.5%
Drug Trafficking	9.8%	Theft	15.1%
Theft	6.6%	Drug Trafficking	9.2%
Burglary	6.3%	Forgery	5.7%
Receiving Stolen Property	4.8%	Burglary	5.0%

- Most offenders (97.6%) pled guilty to charges (female = 96.6%; male= 97.7%). [Table 22]
- Over one-half (53.7%) of the males and over two-thirds (69.1%) of the females in the study were incarcerated on a determinate sentence of between 6-12 months for the most serious conviction offense. [Table 24]
- All the offenders in this sample were entering prison for a new felony conviction and commitment from a county Court of Common Pleas. However, some were on supervision when they committed the actions for which they were sent to prison. Roughly two-fifths of the males (38%) and less than half of the females (48.5%) in the study were incarcerated on either a technical or new crime violation of felony probation or a new crime violation of parole. [Table 27]
- Weapons were involved, in some manner, in the conviction offense in 24.4% of the cases.\* [Table 29]
- Close to half (47.4%) of the offenders were under the influence of drugs or alcohol at the time of at least one of the instant conviction offenses (female = 52.6%; male = 46.6%). [Table 31]

---

\* “involved” includes situations where the offender feigned having a weapon or where a weapon was present but not used in the commitment offense, in addition to situations in which a weapon was used to threaten, injure, or kill.

## Criminal History

- Over half of the offenders (51.7%) have never had a prior adult prison incarceration (male = 49.3%; female 68.4%). [Table 62] Men were more likely than women to have served a prior prison term (male = 50.7%; female = 31.6%) [Table 62], and at least one prior jail incarceration (male = 60.4%; female = 51.4%). [Table 55]
- The female offenders in the sample were almost equally likely as the males to have at least one prior adult supervision term (female = 75.4%; male = 75.5%) [Table 63]. Women were slightly more likely to have at least one prior revocation of adult supervision (female = 57.6%; male = 53.9%). [Table 64]
- Just over three-fourths (77.1%) of the offenders had at least one prior adult conviction for a non-violent misdemeanor (female = 76.3%; male = 77.3%) [Table 51]. Approximately one third (32.0%) of the offenders had at least one prior adult conviction for a violent misdemeanor (female = 18.4%; male = 33.9%). [Table 53]
- More than six in ten offenders (62%) had at least one prior adult felony conviction (female = 48.4%; male = 63.9%). [Table 56]
- Over one-fourth (26.7%) of the offenders had at least one prior adult conviction for a violent (non-sex) felony (female = 12.7%; male = 28.7%). [Table 57]
- Over one-fifth (21.1%) of the offenders had at least one prior adult felony conviction for drug use or possession (female = 20.5%; male = 21.2%). [Table 59]
- Roughly one in seven offenders (13.3%) had at least one prior adult felony conviction for drug sale or trafficking (female = 9.9%; male = 13.7%). [Table 60]
- Over one-fifth of the offenders (23.3%) have had at least one domestic violence conviction as an adult or juvenile (female = 10.4%; male 25.1%). [Table 54]
- Only a small portion (7.5 %) of offenders entering prison are in the highest risk of recidivism group on admission to prison. [Table 67]

## Assessment of SB2 Impact

- The percentage of inmates admitted who were truly non-violent (TNV) was 30.7% in the 2006 Intake Study, halting the rather steady decline since SB2, and is closest to the 31.5% in the 2004 Intake Study. See Table A, below. In the 1992 and 1996 Intake Studies (which included only Pre-Senate Bill 2 inmates), the percentage of truly non-violent inmates was 44.4%. This figure declined to roughly 40 percent in the 1997 and 1998 Intake Studies, and then dropped slowly but steadily to 29.7% in 2005. As noted, the 2006 figure represents a slight rise. A TNV offender is one who has no violent current conviction or indictment offense, no prior felony or misdemeanor conviction for a violent (except F2 or F3 burglary) or sex offense, no gun time, and no weapon involvement in the current offense.

**Table A-Proportion of Each Year’s Intake Who were Truly Non Violent (TNV), in %**

	Intake Study Year										
	1992	1996	1997	1998	2000	2001	2002	2003	2004	2005	2006
% TNV	44.4	44.4	40.0	39.9	38.6	35.8	33.9	33.2	31.5	29.7	30.7

- In 2006, the percentage of TNV offenders who were supervision (parole or probation) violators decreased to 40.4%. This is down from the 44.2% and 44.4% of the 2004 and 2005 Intake Studies and is most similar to the 36% of the 1996 Intake Study. See Table B below, titled “TNV Intake Who were Supervision Violators”, to follow the patterns since 1996.

**Table B-Proportion of Each Year’s TNV Intake Who were Supervision Violators, in %**

TNV Admissions	Intake Study Year									
	1996	1997	1998	2000	2001	2002	2003	2004	2005	2006
% Supervision Violators	36	50	54	49.4	45.8	53.3	53.6	44.2	44.4	40.4

- The percentage of all admissions that were probation violators (Table C, below) has been relatively stable since 1996, with the proportion generally around one-third of commitments.

**Table C-Proportion of each Year’s Total Intake Who were Probation Violators, in %**

Intake Sample Population	Intake Study Year									
	1996	1997	1998	2000	2001	2002	2003	2004	2005	2006
% Probation Violators	30	35	39	36.6	33.6	35.6	32.5	32.8	30.5	30.8

- The percentage of new admissions that had committed a new crime while on parole or post release control decreased in the 2006 Intake Study to 8.5%. (Table D, below) This decrease is very similar to the percentages in 2002 and 2004 (8.5% and 8.6). With the present decrease the percentage is less than reported in any year since the 2002 Intake Study. The rate in the 2006 Intake Study is 4.7 times higher than in the 1996 study. A big part of the reason is the greater number under APA supervision than a decade ago.

**Table D-Proportion of Each Year's Total Intake Who were Parole/PRC Violators, in %**

Intake Sample Population	Intake Study Year									
	1996	1997	1998	2000	2001	2002	2003	2004	2005	2006
% Parole/PRC Violators	1.8	2.5	3.1	4.3	7.9	8.5	10.3	8.6	9.8	8.5

- All of these figures suggest that SB2, in terms of resulting in an intake population that contains a higher proportion of violent/more serious offenders and a smaller proportion of truly non-violent offenders, continues to affect the composition of the prison population to some degree. The increased proportion of TNV offenders admitted into prison in 2006 along with the decrease in the numbers of TNV supervision violators could be an indication of a decreasing impact of SB2.

## INTRODUCTION

The purpose of this report is to present a basic profile of newly committed inmates entering the Ohio Department of Rehabilitation and Correction (DRC) prison system during 2006. The profile of Intake 2006 inmates includes the following information: (1) demographic and social characteristics of the inmates (2) characteristics of the current commitment offense, and (3) the inmate's prior criminal history. These tables may be used to compare the characteristics of inmates entering the prison system across the years for which similar data have been collected (1985, 1992, 1996, 1997, 1998, 2000, 2001, 2002, 2003, 2004 and 2005). Copies of many of the reports are available at <http://www.drc.state.oh.us/web/reports/reports18.asp>.

### Methodology

In general, data for intake studies are collected on all inmates who enter the DRC prison system over a one and a half to two month period. Information is obtained from five sources:

- (1) Interviews with inmates at reception centers;
- (2) Written investigations;
- (3) Microfiche from the records department to supplement partial or incomplete investigation reports;
- (4) The Onbase information system, with offender background reports available in digitized form; and
- (5) County web sites.

The interviews with the inmates, conducted by DRC classification specialists, take place at DRC's three reception centers housed at the Lorain Correctional Institution, the Ohio Reformatory for Women, and the Correctional Reception Center. The emphasis is on social history information not consistently available in offender files. Bureau of Research Offender History staff code this information into the Intake database.

The DRC would like to prepare a full investigation (either a PSI – Pre-Sentence Investigation – for the sentencing judge, an OBI – Offender Background Investigation – a similar document prepared with a focus on DRC information needs or an OBI Summary Sheet – which is a shortened form of an OBI) for each new inmate admitted during 2006. Unfortunately, resource and administrative demands prevent that on a routine basis. Inmates who will be serving sentences less than 90 days frequently enter the system without such a report. Also, the investigations for offenders expected to spend longer than three but less than 12 months are reduced in scope. During the two-month study period, however, APA staff is requested to write investigation reports for all offenders entering Ohio's prisons in order to obtain an accurate representation of all inmates entering the prisons during the intake study period.

The investigation reports primarily consist of pre-sentence investigation and offender background information reports produced by Adult Parole Authority (APA) staff. Most reports are written by APA officers based in the jurisdiction where the offender committed his/her offense(s). The rest are prepared by the probation departments in the committing counties. The report is supplemented, if appropriate, with information on types and amounts of drugs and the value of the theft crimes. Central Office classification specialists then read through each investigation report, collect and code the information for the Intake Study and database.

With such a large data collection effort, it is inevitable that some of the necessary

information on offenders will be missing from the investigation reports. When information is missing, classification specialists must obtain microfiche records (or copies of documents available online in digitized form) on inmates from the records bureau at Central Office, read through the available information and attempt to retrieve the missing information.

Information was collected on all inmates who entered the DRC prison system between May 1<sup>st</sup>, 2006 and June 14, 2006. The resulting data set contains information on a sample of 3,553 newly committed inmates received by DRC during this period. In the next few weeks, side-by-side county comparison tables for the ten highest committing counties are being produced, as well as individualized county profiles for those counties. Similarly, profiles of the Truly Non-Violent, Short Term and Veteran offenders are forthcoming.

### Caveats Regarding the Data

There are several limitations to the data of which the reader should be aware when assessing this information. First, the reader should bear in mind that the characteristics of the offense apply to the most serious conviction offense only. One should be cautious when trying to establish the proportion of offenders serving time for particular offenses. For example, an offender may have been convicted for felonious assault and domestic violence. The proportion of offenders currently entering prison for domestic violence will be underestimated when looking only at the proportion of offenders committed for domestic violence as the most serious offense.

A more accurate representation may be found by also considering offenders for whom domestic violence was the second most serious offense; however, we are not able to identify the number of offenders committed for domestic violence as a third or fourth most serious offense. While we believe that considering the most and second most serious offenses captures important offense characteristics for the majority of offenders entering prison for any given offense, estimates using this database must be considered conservative estimates. Similar precautions should be taken when estimating the various proportions of victim characteristics and other variables associated with particular offenses.<sup>1</sup> The database also does not contain information on the number of counts of offenses upon which the inmate was sentenced.

A second concern regards juvenile offense data. The availability of juvenile records continues to be problematic. Many county juvenile courts have a policy of refusing access to juvenile records; some will permit access only with a signed waiver from the inmate. Other juvenile courts routinely destroy juvenile records for individuals born before a specific date. As a result, the completeness of the juvenile record information remains questionable. Great care should be taken when attempting to draw conclusions from juvenile criminal history information contained in the intake databases.

Several limitations of adult criminal histories in general should be noted. The reader should be aware that the intake offense information is only for prior adult convictions. Few conclusions can be drawn regarding arrests from the data. An exception is that the number of arrests for five years prior to the instant offense is recorded. There is also no information recorded on indictment charges nor plea-bargaining for prior convictions. For example, it is possible that an inmate was, at some previous time, charged with a violent offense but agreed to plead guilty to a lesser, non-violent offense. As a result, there may be a number of individuals in the Intake database who are identified as having no prior convictions for violent offenses, but they actually do have a history of violent behavior.

---

<sup>1</sup> For inquiries that require a greater degree of specificity, please contact the Bureau of Research for additional analysis.

## Representativeness of the Sample

It is important to note how representative this cohort of inmates is when compared to the inmates being admitted throughout the year. Consequently, the Intake 2006 sample should be comparable to inmates admitted during CY 2006. The information below, taken from a dataset of the CY 2005 Commitment Report, illustrates that the Intake 2006 sample closely resembles the year's intake on several basic features

	<b>INTAKE 2006 %</b>	<b>COMM. CY 2006 %</b>
<u>Sex</u>		
Female	12.0	13.2
Male	88.0	86.8
<u>Race</u>		
African American	47.6	46.7
Caucasian	52.0	52.9
<u>Counties of Commitment</u>		
Cuyahoga	19.4	19.8
Hamilton	10.4	10.8
Franklin	8.3	7.6
Summit	6.6	5.9
<u>Type of Offense</u>		
Crimes Against Persons	23.7	23.3
Sex Offenses	6.9	6.3
Burglary Offenses	7.0	7.9
Property Offenses	16.1	15.2
Drug Offenses	29.8	30.8
Motor Vehicle Offenses	1.5	1.7
Fraud Offenses	3.6	2.9
Weapons Offenses	3.7	4.0
Justice and Public Administration	7.7	7.7
Other Offenses	0.0	0.3
<u>Mean Age in Years</u>		
Female	33.6	33.8
Male	32.2	32.3

This comparison suggests strongly that the Intake 2006 sample is representative of all inmates admitted into ODRC's prisons in 2006.

## Structure of the Report

This report is organized into four sections. The first section presents the demographic and social characteristics of the 2006 Intake sample. The second section provides information on the characteristics of the most serious current commitment offense. Information regarding the offender's prior criminal history is presented in section three. Reentry risk assessments, prepared by program staff in the institutions, are reported in section four.

In reviewing the tables, please be aware that due to rounding, percentages may not total exactly to 100%. This condition may be true for any table in this report.

## DEMOGRAPHIC AND SOCIAL CHARACTERISTICS

**TABLE 1: Gender**

SEX	N	%
